Bram Alster, DMD

• *General Dentistry*

For over 30 years, Dr. Alster's family practice has provided dental care of the utmost quality and integrity. Old and new patients alike feel comfortable at their state of the art facility and their caring staff is committed to patient well-being and excellence as procedures are performed in a gentle and thorough manner. He and his experienced team is thrilled that it now includes his son, Dr. Jason Alster.

"With an emphasis on being conservative yet ideal we explain treatment options to our patients to derive a plan most suited to their needs," says Dr. Bram Alster. As Cosmetic and Implant dentists, designing soft and natural smiles that enhance a patient's facial features is important and they offer options such as dental implants, crowns, porcelain veneers, bonding, bleaching and botox® to achieve these goals. Patients may "pre-view" their planned case virtually, utilizing the intra-oral cameras or by "mock-up bonding" in order to see firsthand an approximate "look" prior to committing to treatment.

Dr. Alster is an Invisalign® provider and his extensive training in Implant and Cosmetic Dentistry and Full Mouth Rehabilitation serves his patients well in providing comfort, esthetics and long lasting treatment. He is honored by the fact that many dentists are his patients and he is a member of many professional organizations; also being a "Fellow" of the Congress of Oral Implantologists. Continuing their commitment to taking continuing education the practice maintains teaching associations with St. Josephs Regional Medical Center and Hackensack University Medical Center to better serve their patients and their profession.
